

EMI Shielding Material

Conductive Form-In-Place Gasket

MATERIAL

Conductive silicone that is cured at room temperature.

FEATURES

- Applicable for low temperature plastics
- Enhanced galvanic corrosion resistance and stability in severe environments

Force-Deflection-Resistance of F5521 Gasket

D Shape 1.0 mm(H) * 1.3 mm(W)
Rate of Strain, 1.5mm/min

PROPERTIES	F5521
Elastomer Binder	Silicone
Conductive Filler	Ag/Al
Cure System	Moisture
Density	2.01 g/cm ³
Hardness	55 Shore A
Adhesion on Al Metal	>80 N/cm ²
Tensile Strength	130 psi
Tear Strength	18 Lbf/in
Operating Temperature	-45 to 150 °C
Flammability Rating (UL94V-0)	E303387
DC-Through Resistance @ 30% Compression, 1mm H	<0.07 Ohm
Shielding Effectiveness 200 MHz - 40 GHz	>100 dB
Min. Bead Height	0.3 mm
